The Secretariat of the International Atomic Energy Agency (IAEA) presents its compliments to the IAEA's Member States and has the honour to draw their attention to the **International Symposium on Standards, Applications and Quality Assurance in Medical Radiation Dosimetry (IDOS 2026)** (hereinafter referred to as "event") to be held at the IAEA's Headquarters in Vienna, Austria, from **5 to 9 October 2026**.

The purpose of the event is to provide an international forum to discuss and disseminate the latest advances across radiation dosimetry, radiation medicine, radiation protection and associated standards. In covering all of the medical specialities that utilize ionizing radiation, the symposium will specifically focus on the fields in which dosimetry standardization is essential: radiotherapy, radiology, radiopharmaceutical therapy and nuclear medicine. Moreover, the symposium will address cross-cutting topics such as artificial intelligence-based methods, uncertainty of measurements, and dosimetric audits; outline future trends; and identify areas for improvement. Its proceedings and conclusions will help to provide relevant recommendations for the medical and scientific community.

The event will be held in English.

Member States are invited to disseminate the attached Announcement and Call for Papers to the target audience for the event and to designate participants using the InTouch+ platform, as indicated in Section H. Member States are strongly encouraged to designate women participants.

The IAEA is generally not in a position to bear the travel and other costs of participants in the event. The IAEA has, however, limited funds at its disposal to help meet the cost of attendance of certain participants. Upon specific request, such assistance may be offered to normally one participant per country, provided that, in the IAEA's view, the participant will make an important contribution to the event.

Applications for financial assistance, as well as submissions of papers, can only be considered if received via InTouch+ by the deadlines indicated in Section O of the Announcement and Call for Papers.

It should be noted that compensation is not payable by the IAEA for any damage to or loss of personal property. The IAEA also does not provide health insurance coverage for participants in events. Arrangements for private insurance coverage on an individual basis should therefore be made. The IAEA will, however, provide insurance coverage for accidents and illnesses that clearly result from any work performed for the IAEA.

The Secretariat of the International Atomic Energy Agency avails itself of this opportunity to renew to the IAEA's Member States the assurances of its highest consideration.
