Technical Meeting of the Uranium Mining and Remediation Exchange Group

IAEA Headquarters, Vienna, Austria
and virtual participation via Microsoft Teams

31 August – 4 September 2026

Ref. No.: EVT2503699

Information Sheet

Introduction

The Uranium Mining Remediation Exchange Group (UMREG) has been running in various forms for over 30 years as a facilitated information exchange space between groups conducting remediation projects of uranium mining and milling sites. The first bilateral (WISMUT/US-DOE) meetings were held in 1993 and 1994. In 2011, UMREG moved to the IAEA as an official event, with the first meeting held in 2012. Since then, UMREG became an activity within the regular programme of the IAEA Division of Nuclear Fuel Cycle and Waste Technology (NEFW), originally within the IAEA Uranium Production Cycle team of the Nuclear Fuel Cycle and Materials Section (NFCMS) and now under the Environmental Remediation team of the Decommissioning and Environmental Remediation Section (D&ERS) allowing for discussions on environmental aspects of uranium mining, milling, closure, decommissioning and environmental remediation. In this context, the IAEA provides a Scientific Secretary, administrative support and funding for UMREG meetings that are held as cross-cutting activities, with other departments/divisions of the IAEA.

In 2025, a Technical Meeting of UMREG was held with the objective to explore recent advancements in the remediation of uranium mining and legacy sites affected by naturally occurring radioactive materials (NORM). Emphasis was placed on solutions that incorporate principles of circularity, sustainability, and long-term institutional control.

An outcome of the 2025 technical meeting was a proposed project – STREAMS (Sustainable Mining and Resilient Environmental Remediation in line with Circular Economy Principles and Social Integration Encompassing Artisanal Mining). This project aims to address these pressing challenges by advancing the adoption of sustainable mining practices and, where necessary, implementing resilient environmental remediation strategies. These efforts will be grounded in circular economy principles, promoting resource efficiency, waste reduction, and the reintegration of materials into productive use. In parallel, the project will prioritize inclusive development by fostering social integration, enhancing community resilience, and empowering local populations - particularly those engaged in artisanal and small-scale mining - through participatory approaches and capacity-building initiatives.

Objectives

The purpose of this event is to discuss the latest developments in the remediation of uranium mining and NORM legacy sites, with a focus on solutions that contemplate aspects of circularity and sustainability and long-term institutional controls. In line with these objectives, the meeting will establish outputs recommended to be implemented in the scope of UMREG activities in the next two-five years.

Target Audience

Representatives of national and international organizations concerned with environmental remediation of uranium mining and processing sites including legacy sites as to include:

- government officials with policy responsibility for environmental remediation;
- managers and members of regulatory authorities;
- managers and implementers of environmental remediation projects and facility operators;
- managers and planners from environmental remediation organizations/projects;
- researchers from universities and research institutions;
- officials from concerned international organizations.

Working Language

English.

Topics

UMREG meetings have highlighted several recurring challenges that impact the effectiveness and sustainability of uranium mining remediation efforts. These challenges span technical, regulatory, financial, and social dimensions. The following topics will be included in the programme:

- Sustainability and circularity in current and future uranium and NORM-related mining and processing aiming at avoiding future legacy sites;
- Innovative approaches to mine closure and remediation to minimize post-remedial long-term costs and use restrictions;
- Long-term care and maintenance of remediated objects (e.g., capped mine waste deposits, flooded mine voids, tailings storage facilities maintenance, post-remedial mine water management etc.);
- Minimizing post-remedial long-term costs and use restrictions through innovative approaches to mine closure and site remediation;
- Funding mechanisms for long-term institutional controls;
- Stakeholder perception challenges in new uranium mining projects.

Participation and Registration

All persons wishing to participate in the event have to be designated by an IAEA Member State or should be members of organizations that have been invited to attend.

In order to be designated by an IAEA Member State or invited organization, participants are requested to submit their application via the InTouch+ platform (<https://intouchplus.iaea.org>) to the competent national authority (Ministry of Foreign Affairs, Permanent Mission to the IAEA or National Atomic Energy Authority) or organization for onward transmission to the IAEA by **3 July 2026**, following the registration procedure in InTouch+:

1. Access the InTouch+ platform (<https://intouchplus.iaea.org>):
 - Persons with an existing NUCLEUS account can sign in to the platform with their username and password;
 - Persons without an existing NUCLEUS account can register [here](#).
2. Once signed in, prospective participants can use the InTouch+ platform to:
 - Complete or update their personal details under ‘Complete Profile’ and upload the relevant supporting documents;
 - Search for the relevant event under the ‘My Eligible Events’ tab;
 - Select the Member State or invited organization they want to represent from the drop-down menu entitled ‘Designating Authority’ (if an invited organization is not listed, please contact InTouchPlus.Contact-Point@iaea.org);
 - If applicable, indicate whether financial support is requested and complete the relevant information (this is not applicable to participants from invited organizations);
 - Based on the data input, the InTouch+ platform will automatically generate the Participation Form (Form A) and/or the Grant Application Form (Form C);
 - Submit their application.

Once submitted through the InTouch+ platform, the application, together with the auto-generated form(s), will be transmitted automatically to the required authority for approval. If approved, the application, together with the applicable form(s), will automatically be sent to the IAEA through the online platform.

NOTE: The application for financial support should be made, together with the submission of the application, by **3 July 2026**.

For additional information on how to apply for an event, please refer to the [InTouch+ Help](#) page. Any other issues or queries related to InTouch+ can be sent to InTouchPlus.Contact-Point@iaea.org.

Selected participants will be informed in due course on the procedures to be followed with regard to administrative and financial matters.

Participants are hereby informed that the personal data they submit will be processed in line with the [Agency's Personal Data and Privacy Policy](#) and is collected solely for the purpose(s) of reviewing and assessing the application and to complete logistical arrangements where required. The IAEA may also use the contact details of Applicants to inform them of the IAEA's scientific and technical publications, or the latest employment opportunities and current open vacancies at the IAEA. These secondary purposes are consistent with the IAEA's mandate. Further information can be found in the [Data Processing Notice](#) concerning IAEA InTouch+ platform.

Papers and Presentations

The IAEA encourages participants to give presentations on the work of their respective institutions that falls under the topics listed in above Topics Section.

Participants who wish to give presentations are requested to submit an abstract of their work. The abstract will be reviewed as part of the selection process for presentations. The abstract should be in A4 page format, should extend to no more than 3 pages (including figures and tables) and should not exceed 500 words. It should be sent electronically to Ms Sandra Faught, Ms Carmen Good and Ms Chantal Mommaert, the Scientific Secretaries of the event (see contact details below), not later than **3 July 2026**. Authors will be notified of the acceptance of their proposed presentations by **20 July 2026**.

Submission of a paper should be confirmed, together with the submission of the main application via the InTouch+ platform, by **3 July 2026**.

Expenditures and Grants

No registration fee is charged to participants.

The IAEA is generally not in a position to bear the travel and other costs of participants in the event. The IAEA has, however, limited funds at its disposal to help meet the cost of attendance of certain participants. Upon specific request, such assistance may be offered to normally one participant per country, provided that, in the IAEA's view, the participant will make an important contribution to the event.

The application for financial support should be made, together with the submission of the application, by **3 July 2026**.

Venue

The event will be held at the Vienna International Centre (VIC) where the IAEA's Headquarters are located. Participants must make their own travel and accommodation arrangements.

General information on the VIC and other practical details, such as a list of hotels offering a reduced rate for IAEA participants, are listed on the following IAEA web page: <https://www.iaea.org/events>.

Participants are advised to arrive at Checkpoint 1/Gate 1 of the VIC one hour before the start of the event on the first day in order to allow for timely registration. Participants will need to present an official photo identification document in order to be admitted to the VIC premises.

Visas

Participants who require a visa to enter Austria should submit the necessary application to the nearest diplomatic or consular representative of Austria at least four weeks before they travel to Austria. Since Austria is a Schengen State, persons requiring a visa will have to apply for a Schengen visa. In States where Austria has no diplomatic mission, visas can be obtained from the consular authority of a Schengen Partner State representing Austria in the country in question.

IAEA Contacts

Scientific Secretaries:

Ms Sandra Faught

Division of Nuclear Fuel Cycle and Waste Technology
Department of Nuclear Energy
International Atomic Energy Agency
Vienna International Centre
PO Box 100
1400 VIENNA
AUSTRIA

Tel.: +43 1 2600 21968

Fax: +43 1 26007

Email: S.Faught@iaea.org

Ms Carmen Good

Division of Nuclear Fuel Cycle and Waste Technology
Department of Nuclear Energy
International Atomic Energy Agency
Vienna International Centre
PO Box 100
1400 VIENNA
AUSTRIA

Tel.: +43 1 2600 22650

Fax: +43 1 26007

Email: C.Good@iaea.org

Ms Chantal Mommaert

Division of Radiation, Transport and Waste Safety
Department of Nuclear Safety and Security
International Atomic Energy Agency
Vienna International Centre
PO Box 100
1400 VIENNA
AUSTRIA

Tel.: +43 1 2600 22621

Fax: +43 1 26007

Email: C.Mommaert@iaea.org

Administrative Secretary:

Mr Jovan Catovic

Division of Nuclear Fuel Cycle and Waste Technology
Department of Nuclear Energy
International Atomic Energy Agency
Vienna International Centre
PO Box 100
1400 VIENNA
AUSTRIA

Tel.: +43 1 2600 22754

Fax: +43 1 26007

Email: J.Catovic@iaea.org

Subsequent correspondence on scientific matters should be sent to the Scientific Secretary/Secretaries and correspondence on other matters related to the event to the Administrative Secretary.
