The Secretariat of the International Atomic Energy Agency (IAEA) presents its compliments to the IAEA's Member States and has the honour to draw their attention to the IAEA Marie Skłodowska-Curie Fellowship Programme (MSCFP).

As you are aware, the IAEA Marie Skłodowska-Curie Fellowship Programme (MSCFP) helps to encourage young women to pursue careers in the nuclear field. Over the four years since its launch, the MSCFP has already supported 560 female students representing 121 Member States studying in 72 countries around the globe. As of June 2024, 220 have already completed their master's programme with support from MSCFP and have either pursued a job or PhD studies in their field or an internship in line with their specialization facilitated by the IAEA.

I am glad to inform you that the application period for the MSCFP 2024 cycle opened on 12 July 2024 and will close on 30 September 2024. Female students can apply for scholarships for academic years 2024/2025 and 2025/2026.

Selected students will receive a scholarship for master's programmes in nuclear related studies from accredited universities. They will also be provided with an opportunity to pursue an internship facilitated by the IAEA for up to 12 months.

MSCFP is a continuous initiative with the aim to ensure that more women have an opportunity to pursue advanced education in nuclear related fields, thus this year the programme will provide scholarships to more female students, for master's programmes in nuclear related fields, including internship opportunities facilitated by IAEA. Consideration is given to geographic distribution, the field of study distribution, linguistic diversity and whether the applicant has received previous support from the IAEA.

To help with broad dissemination of the information, I would greatly appreciate if this communication is shared with your relevant national Authority for further distribution among potential donors and partners, universities and students in your country.

More information on MSCFP can be found on www.iaea.org/MSCFP including detailed instructions on how to apply.

The Secretariat of the International Atomic Energy Agency avails itself of this opportunity to renew to the IAEA's Member States the assurances of its highest consideration.
